| Department:                                     |                           | Division:          |   |  |  |  |
| -   |                           |                    |   |  |  |  |
| Do you have any food or drug/vaccine allergies? |                           | Yes No             |   |  |  |  |
| If yes, provide details:                        |                           |                    |   |  |  |  |
|   |                           |                    |   |  |  |  |

A Health Screen is an integral part of your hospital appointment and <u>must</u> be completed prior to your start date. The required/recommended vaccinations and TB testing may be administered at your family physician's office or at the local health unit in the area which you reside. Visiting Electives are directed to send their completed forms with proof of immunizations/testing to Victoria Hospital Occupational Health Department at LHSC. (See below for further details). These records may be available from the Occupational Health department of the Hospital where you are completing your residency.

Visiting Elective Physicians who perform exposure-prone procedures have an ethical responsibility to know their serological status for Hepatitis B Virus, Hepatitis C Virus and Human Immunodeficiency Virus (HIV). Those who learn they are infected should seek advice from their professional regulatory body. For those with no regulatory body, the local Medical Officer of Health or OHSS can provide advice with respect to recommended safe work practices.

A Visiting Elective who is unwilling or unable to be vaccinated may require work restrictions and/or a work accommodation. Work accommodations are based on the relevant exposure risks, and subject to the hospital's ability to accommodate.

#### Vaccination Recommendations/Requirements

1. Red Measles

You require 2 doses of measles containing vaccine with the first dose being given on or after your 1<sup>st</sup> birthday and the second dose given at least 4 weeks from the first dose OR laboratory evidence of immunity.

2. Rubella

You require 1 dose of rubella containing vaccine, given on or after your 1st birthday OR laboratory evidence of immunity.

3. Mumps

You require 2 doses of mumps containing vaccine with the first dose being given on or after your 1<sup>st</sup> birthday and the second dose given at least 4 weeks from the first dose OR laboratory evidence of immunity.

4. Varicella (Chicken pox)

# **CITY-WIDE HEALTH SCREEN FOR VISITING ELECTIVES**

You require documented receipt of 2 doses of varicella vaccine (eg, physician's certificate or vaccination record) OR laboratory evidence of varicella immunity, or laboratory confirmation of disease. Immunization is recommended for those without immunity.

### 5. Tetanus/Diphtheria

It is recommended that you receive a primary series of Tetanus/Diphtheria in childhood followed by a routine booster every ten (10) years. If you have not already received a primary Tetanus/Diphtheria series, then you require three doses as part of an adult primary immunization regimen and should contact your family physician or Health Unit in order to complete your primary series.

### 6. Tetanus/Diphtheria/Pertussis (Tdap)

It is recommended that you receive a one-time dose of Tetanus/Diphtheria and Acellular Pertussis booster. If you are providing care to pregnant women and/or children, you should receive this one-time dose of Tdap as soon as possible. Otherwise, you can wait until your next tetanus booster is due.

#### 7. Hepatitis B

It is recommended that all health care workers receive a course of Hepatitis B vaccine. For your protection, it is important to obtain a Hepatitis B antibody titre following immunization to ensure that you are adequately protected. If you have been vaccinated, please provide laboratory report of your antiHbs level.

### Tuberculosis (TB) Surveillance and Isoniazid (INH)

If your Tuberculin Skin Test (TST) status is unknown, or previously identified as tuberculin negative, regardless of BCG vaccine, you require a baseline two-step TST unless you have: documented results of a prior two-step test, OR documentation of a negative TST within the last 12 months, in which case a single-step test may be given. (taken from the Tuberculoisis Surveillance Protocol for Ontario Hospitals – OHA Aug 2014)

Please indicate in the box on page 4 if you have recently travelled to a TB Endemic area.

#### Individuals with Positive TB Skin Tests

You must provide documentation of a recent (within the past 12 months) chest X-ray. If you have a history of a confirmed positive TB test and you have already received counseling or advice concerning prophylactic treatment (Isoniazid), you should provide a copy of your consult note.

TB Positive individuals are to also complete the LHSC TB Positive Questionnaire, which can be found at the following link <a href="https://www.sjhc.london.on.ca/sites/default/files/pdf/medicalaffairs\_tbsurvey.pdf">https://www.sjhc.london.on.ca/sites/default/files/pdf/medicalaffairs\_tbsurvey.pdf</a>

#### N95 Fit Testing

Fit Testing is required every two years. If you have been fit tested to one of the following N95 respirators within the last two years, additional fit testing is not required at this time. However, you will need to provide proof of your current fit testing record along with your immunization requirements.

• 3M model 1870/9210

• 3M model 8210

• 3M model 1860S

# **CITY-WIDE HEALTH SCREEN FOR VISITING ELECTIVES**

## Please complete the following immunization / history section (MUST Provide Proof)

Proof of immunization is required and includes any of the following:

- Vaccination records from yellow immunization cards
- Immigration records
- Notes from physician's offices
- Copies of laboratory reports (titres)
- Health Unit records

• Other hospital electronic immunization records (provided they are signed by a physician or nurse) from the Occupational Health department of the Hospital where you are completing your residency.

Please list any medical conditions or restrictions that you may wish the Occupational Health Nurse to be aware of:

Have you been fit-tested within the last 2 years to wear an N95 respirator?

All information received is strictly confidential. It will be shared between Occupational Health departments at LHSC and St. Joseph's to complete health screen requirements, and will reside at the Occupational Health department of the organization Medical Affairs deems to be your place of primary appointment.
