## OUR VISION

From the shortest visit to the longest stay, we earn complete confidence in the care we provide, and make a lasting difference in the quest to live fully.

## OUR MISSION

We help all who come to us for care to maintain and improve their health. We work with people to minimize the effects of injury, disease and disability. We do this by pursuing excellence in care, research and education in a wide range of hospital, clinic, long term and community-based settings.

In the spirit of our founders, we care in the example of Jesus Christ and in keeping with our values. We attend to the wholeness of each person – body, mind and spirit. We are a life-affirming community, nurturing a living spirituality through all stages of life, health, suffering and death. We ensure ongoing ethical reflection.

We advocate for those who are vulnerable and without a voice. We actively pursue and build partnerships to create a better health care system.

## OUR VALUES

Respect • Excellence • Compassion

Because  
brain injuries  
are crippling...  
we are restoring  
hopes and  
dreams.

St. Joseph's is teaching  
Sarah the skills to help her  
get back to the classroom.

## ST. JOSEPH'S HEALTH CARE FOUNDATION

With the support of a giving community, St. Joseph's Health Care Foundation invests in health care innovation and discovery at St. Joseph's Health Care London that would otherwise not be possible.

Our foundation is committed to patient care, donor accountability and volunteerism. We are proud to continue meeting Imagine Canada's Ethics Fundraising and Financial Accountability Code.

## LAWSON HEALTH RESEARCH INSTITUTE

Lawson Health Research Institute is the research institute of St. Joseph's Health Care London and London Health Sciences Centre. Lawson is one of the top 10 hospital-based research institutes in Canada attracting over \$100 million in research income each year. Lawson is recognized internationally for its research and clinical work, spanning the full continuum of human life. At St. Joseph's Health Care London, Lawson investigators focus their research on diabetes, geriatric care, rehabilitation, probiotics and imaging. Advances derived from research are applied directly to patient care and are shared through its regional outreach programs.
